RIFLE criteria for acute kidney injury are associated with hospital mortality in critically ill patients: a cohort analysis

acute kidney injury

RIFLE criteria for acute kidney injury are associated with hospital mortality in critically ill patients: a cohort analysis acute kidney injury
The lack of a standard definition for acute kidney injury has resulted in a large variation in the reported incidence and associated mortality. RIFLE, a newly developed international consensus classification for acute kidney injury, defines three grades of severity – risk (class R), injury (class I) and failure (class F) – but has not yet been evaluated in a clinical series.
