Bud Fox Ph.D., Zhang Wenzu Ph.D., Tan May Ling M.Sc.

Software Application Development: A Visual C++, MFC, and STL Tutorial (Chapman & Hall/CRC Computer and Information Science Series) Bud Fox Ph.D., Zhang Wenzu Ph.D., Tan May Ling M.Sc.

Software Application Development: A Visual C++, MFC, and STL Tutorial provides a detailed account of the software development process using Visual C++, MFC, and STL. It covers everything from the design to the implementation of all software modules, resulting in a demonstration application prototype which may be used to efficiently represent mathematical equations, perform interactive and intuitive model-building, and conduct control engineering experiments.

All computer code is included, allowing developers to extend and reuse the software modules for their own project work. The book’s tutorial-like approach empowers students and practitioners with the knowledge and skills required to perform disciplined, quality, real-world software engineering.

From reader reviews:

David Chambers:

Nowadays reading books be a little more than want or need but also get a life style. This reading addiction give you lot of advantages. The benefits you got of course the knowledge the actual information inside the book that will improve your knowledge and information. The information you get based on what kind of reserve you read, if you want have more knowledge just go with education and learning books but if you want sense happy read one along with theme for entertaining like comic or novel. Often the Software Application Development: A Visual C++, MFC, and STL Tutorial (Chapman & Hall/CRC Computer and Information Science Series) is kind of reserve which is giving the reader capricious experience.

Henry Jensen:

People live in this new time of lifestyle always attempt to and must have the extra time or they will get lots of stress from both everyday life and work. So , if we ask do people have free time, we will say absolutely without a doubt. People is human not really a huge robot. Then we inquire again, what kind of activity do you possess when the spare time coming to a person of course your answer will unlimited right. Then do you try this one, reading textbooks. It can be your alternative inside spending your spare time, often the book you have read is definitely Software Application Development: A Visual C++, MFC, and STL Tutorial (Chapman & Hall/CRC Computer and Information Science Series).

Brian Nelson:

Software Application Development: A Visual C++, MFC, and STL Tutorial (Chapman & Hall/CRC Computer and Information Science Series) can be one of your starter books that are good idea. Many of us recommend that straight away because this book has good vocabulary that will increase your knowledge in vocab, easy to understand, bit entertaining however delivering the information. The copy writer giving his/her effort to place every word into delight arrangement in writing Software Application Development: A Visual C++, MFC, and STL Tutorial (Chapman & Hall/CRC Computer and Information Science Series) however doesn't forget the main position, giving the reader the hottest and also based confirm resource data that maybe you can be considered one of it. This great information could drawn you into brand new stage of crucial considering.

Treva Ritter:

You may spend your free time to see this book this guide. This Software Application Development: A Visual C++, MFC, and STL Tutorial (Chapman & Hall/CRC Computer and Information Science Series) is simple bringing you can read it in the park, in the beach, train as well as soon. If you did not include much space to bring typically the printed book, you can buy the actual e-book. It is make you better to read it. You can save the particular book in your smart phone. Therefore there are a lot of benefits that you will get when you buy

this book.
