Elsevier's Dictionary Of Symbols And Imagery: In English With Definitions Ad De Vries
This dictionary supplies associations which have been evoked by plants, animals, gems, objects and concepts throughout the history of Western civilization, from the hieroglyphs of ancient Egypt to the poetry of Dylan Thomas. It supplies background information from fields which may not be everyone's specialty, such as biology and mythology. It gives not one, but several meanings which may apply simultaneously, since indefiniteness is the mark of symbols. No fine distinction is made between symbols, allegories, metaphors, signs, types or images, since such subtle distinctions, however sensible from a scientific point of view, are useless to a person struggling with the deeper comprehension, and thus appreciation, of a particular 'symbol'.Important general entries are listed such as archetypes, ass, binary, bull, calendar, eagle, elements, Great Goddess, Sacred King, sun, etc., which it is advisable to read first. Information was gathered from primary sources: both famous and obscure classical authors; the Bible; the medieval scholar and musician Hildegard von Bingen; but also Donne, Shakespeare and Eliot. Lists of primary and secondary literature are included.
