Introduction to Environmental Engineering

MacKenzie Leo Davis

Introduction to Environmental Engineering MacKenzie Leo Davis
"Introduction to Environmental Engineering, 4/e" contains the essential science and engineering principles needed for introductory courses and it is used as the basis for more advanced courses in environmental engineering. Davis and Cornwell apply the concepts of sustainability and materials and energy balance as a means of understanding and solving environmental engineering issues. With 650 end-of-chapter problems, as well as provocative discussion questions, and a helpful list of review items found at the end of each chapter, the text is both a comprehensible and comprehensive tool for any environmental engineering course.
