21 Unexpected Ways The World Could End: Ultra-short stories of sci-fi apocalypse

Steve Hewson

21 Unexpected Ways The World Could End: Ultra-short stories of sci-fi apocalypse Steve Hewson War, famine, freak weather, natural disasters: we are used to hearing stories of tragedy, conflict and general impending doom. It is clear that we live in uncertain and worrying times; but how deep do our worries go? Do we worry enough?

There are a few standard ways in which it is expected that the world would end, were it to choose to do so: conflict, global warming, virus, famine. However, we would soon realise there are actually many, many more unexpected ways in which it might also end, should we choose to think about it.

Fate has a habit of sneaking up on smug, superior civilisations without warning. If there were any left, we could ask the Aztecs, the Mayans or the Martians if they anticipated the cause of their respective dooms. Disaster struck surely and swiftly for these societies, eradicating them without trace, except for the odd ancient ruin, ziggurat or canal. Will the same happen for the ‘civilisations’ which inhabit the world today? How much longer have we got left to continue our, on the cosmic scale of things, trivial little lives?

The following 21 ultra-short stories demonstrate why the world is far more dangerous than you might have imagined in your darkest moments: delving deep into science and the imagination we shall uncover some of the more, shall we say, unexpected ways in which the world could end.

Read on, and get ready to expect the unexpected!
