Mastering Python Data Visualization

Kirthi Raman

Mastering Python Data Visualization Kirthi Raman
About This Book Explore various tools and their strengths while building meaningful representations that can make it easier to understand data Packed with computational methods and algorithms in diverse fields of science Written in an easy-to-follow categorical style, this book discusses some niche techniques that will make your code easier to work with and reuse Who This Book Is For If you are a Python developer who performs data visualization and wants to develop your existing Python knowledge, then this book is for you. A basic knowledge level and understanding of Python libraries is assumed. What You Will Learn Gather, cleanse, access, and map data to a visual framework Recognize which visualization method is applicable and learn best practices for data visualization Get acquainted with reader-driven narratives, author-driven narratives, and the principles of perception Understand why Python is an effective tool for numerical computation much like MATLAB, and explore some interesting data structures that come with it Use various visualization techniques to explore how Python can be very useful for financial and statistical computations Compare Python with other visualization approaches using Julia and a JavaScript-based framework such as D3.js Discover how Python can be used in conjunction with NoSQL, such as Hive, to produce results efficiently in a distributed environment In Detail Python has a handful of open source libraries for numerical computations that involve optimization, linear algebra, integration, interpolation, and other special functions using array objects, machine learning, data mining, and plotting. This book offers practical guidance to help you on the journey to effective data visualization. Commencing with a chapter on the data framework, the book covers the complete visualization process, using the most popular Python libraries with working examples. You will learn how to use NumPy, SciPy,

From reader reviews:

Eloise Torres:

The book Mastering Python Data Visualization can give more knowledge and also the precise product information about everything you want. Why must we leave the good thing like a book Mastering Python Data Visualization? A number of you have a different opinion about publication. But one aim that will book can give many facts for us. It is absolutely proper. Right now, try to closer with your book. Knowledge or information that you take for that, you may give for each other; you may share all of these. Book Mastering Python Data Visualization has simple shape however, you know: it has great and big function for you. You can search the enormous world by wide open and read a guide. So it is very wonderful.

Melinda Kendall:

The publication untitled Mastering Python Data Visualization is the e-book that recommended to you to see. You can see the quality of the publication content that will be shown to a person. The language that author use to explained their way of doing something is easily to understand. The writer was did a lot of research when write the book, hence the information that they share to your account is absolutely accurate. You also can get the e-book of Mastering Python Data Visualization from the publisher to make you much more enjoy free time.

Dana Register:

Your reading 6th sense will not betray an individual, why because this Mastering Python Data Visualization e-book written by well-known writer we are excited for well how to make book that can be understand by anyone who have read the book. Written in good manner for you, leaking every ideas and creating skill only for eliminate your own hunger then you still question Mastering Python Data Visualization as good book but not only by the cover but also from the content. This is one book that can break don't determine book by its handle, so do you still needing another sixth sense to pick this particular!? Oh come on your reading through sixth sense already told you so why you have to listening to a different sixth sense.

Violet Jarrell:

As a student exactly feel bored to reading. If their teacher inquired them to go to the library in order to make summary for some book, they are complained. Just tiny students that has reading's heart or real their interest. They just do what the trainer want, like asked to go to the library. They go to generally there but nothing reading critically. Any students feel that looking at is not important, boring and also can't see colorful pictures on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this time, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore , this Mastering Python Data Visualization can make you really feel more interested to read.
