Temporality: Universals and Variation (Explorations in Semantics)

Maria Bittner

Temporality: Universals and Variation (Explorations in Semantics) Maria Bittner

Temporality surveys the ways in which languages of different types refer to past, present, and future events, through an in-depth examination of four major language types: tense-based English, tense-aspect-based Polish, aspect-based Chinese, and mood-based Kalaallisut.

- Cutting-edge research on directly compositional dynamic semantics of languages with and without grammatical tense
- New in-depth analysis of temporal, aspectual, modal, as well as nominal discourse reference
- Presents a novel logical language for representing linguistic meaning (Update with Centering)
- Develops a unified theory of tense, aspect, mood, and person as different types of ‘grammatical centering systems’
