Vertebrates: Comparative Anatomy, Function, Evolution with Comparative Vertebrate Anatomy: A Laboratory Dissection Guide

Kenneth Kardong

Vertebrates: Comparative Anatomy, Function, Evolution with Comparative Vertebrate Anatomy: A Laboratory Dissection Guide Kenneth Kardong
This one-semester text is designed for an upper-level majors course. Vertebrates features a unique emphasis on function and evolution of vertebrates, complete anatomical detail, and excellent pedagogy. Vertebrate groups are organized phylogenetically, and their systems discussed within such a context. Morphology is foremost, but the author has developed and integrated an understanding of function and evolution into the discussion of anatomy of the various systems.

The high-quality laboratory manual may accompany any comparative anatomy text, but correlates directly to Kardong's *Vertebrates: Comparative Anatomy, Function, Evolution* text. This lab manual carefully guides students through dissections and is richly illustrated. First and foremost, the basic animal architecture is presented in a clear and concise manner. Throughout the dissections, the authors pause strategically to bring the students' attention to the significance of the material they have just covered.
