Spatial Econometrics: Methods and Models (Studies in Operational Regional Science)

L. Anselin

Spatial Econometrics: Methods and Models (Studies in Operational Regional Science) L. Anselin Spatial econometrics deals with spatial dependence and spatial heterogeneity, critical aspects of the data used by regional scientists. These characteristics may cause standard econometric techniques to become inappropriate. In this book, I combine several recent research results to construct a comprehensive approach to the incorporation of spatial effects in econometrics. My primary focus is to demonstrate how these spatial effects can be considered as special cases of general frameworks in standard econometrics, and to outline how they necessitate a separate set of methods and techniques, encompassed within the field of spatial econometrics. My viewpoint differs from that taken in the discussion of spatial autocorrelation in spatial statistics - e.g., most recently by Cliff and Ord (1981) and Upton and Fingleton (1985) - in that I am mostly concerned with the relevance of spatial effects on model specification, estimation and other inference, in what I call a model-driven approach, as opposed to a data-driven approach in spatial statistics. I attempt to combine a rigorous econometric perspective with a comprehensive treatment of methodological issues in spatial analysis.

From reader reviews:

James Stumbaugh:

This book untitled Spatial Econometrics: Methods and Models (Studies in Operational Regional Science) to be one of several books that will best seller in this year, this is because when you read this publication you can get a lot of benefit into it. You will easily to buy this kind of book in the book retail store or you can order it via online. The publisher of this book sells the e-book too. It makes you quickly to read this book, as you can read this book in your Smartphone. So there is no reason for your requirements to past this book from your list.

Tyler Emery:

The particular book Spatial Econometrics: Methods and Models (Studies in Operational Regional Science) has a lot of knowledge on it. So when you read this book you can get a lot of gain. The book was compiled by the very famous author. This articles author makes some research just before write this book. That book very easy to read you can find the point easily after looking over this book.

Sara Jones:

Playing with family within a park, coming to see the coastal world or hanging out with friends is thing that usually you could have done when you have spare time, then why you don't try issue that really opposite from that. A single activity that make you not sensation tired but still relaxing, trilling like on roller coaster you are ride on and with addition of information. Even you love Spatial Econometrics: Methods and Models (Studies in Operational Regional Science), you are able to enjoy both. It is good combination right, you still wish to miss it? What kind of hangout type is it? Oh can happen its mind hangout folks. What? Still don't obtain it, oh come on its named reading friends.

Catherine Cote:

This Spatial Econometrics: Methods and Models (Studies in Operational Regional Science) is new way for you who has fascination to look for some information given it relief your hunger details. Getting deeper you in it getting knowledge more you know or you who still having bit of digest in reading this Spatial Econometrics: Methods and Models (Studies in Operational Regional Science) can be the light food to suit your needs because the information inside that book is easy to get through anyone. These books develop itself in the form which is reachable by anyone, that's why I mean in the e-book contact form. People who think that in publication form make them feel tired even dizzy this reserve is the answer. So there is not any in reading a publication especially this one. You can find actually looking for. It should be here for anyone. So , don't miss it! Just read this e-book kind for your better life as well as knowledge.
