Beyond Nature and Nurture: Conceiving a Better Way to Understand Genes and Memes

Peter Baofu

Beyond Nature and Nurture: Conceiving a Better Way to Understand Genes and Memes Peter Baofu Why are some individuals relatively more successful than others in achievement? And why are some countries (or regions), for that matter, relatively more successful than others in development? Contrary to the conventional wisdom held by many, Dr. Baofu argues that the nature-nurture debate is misleading and faulty, since his 'transcendent approach' is to show how and why the two are closely intertwined in producing the behavioral differences as often seen in individual human endeavors on the micro scale, and for that matter, in country (or regional) endeavors on the macro one - without, however, committing 'the compromise fallacy' as often seen in an in-between alternative. The debate also obscures something more tremendous in the long run, in relation to the emergence of what Dr. Baofu originally proposed as the 'post-human' world that humans have never known, when human genes will no longer exist. Human genes have their days numbered.
