Hitler’s life and his belief in super humans or a superior race is well known, but the extends to which he and his Third Reich went to find these in reality is less known and mind boggling. Hitler believed in the ‘Hollow Earth’ theory where according to legends were inhabited by a human race far superior than normal humans on earth. He intended to seek their help and use their superior technology.

So that on every front, from stealth technology to nuclear power Hitler’s push for scientific success fueled by the Nazi dream of a Global Reich - a German Empire lasting a thousand years could be a reality. Hitler believed there was an opening to this ‘Hollow Earth’ in the unexplored Antarctica, thus the Fuhrer (Hitler) had sent expeditions to the South pole (aka Antarctica) for the very same purpose. Also he had other intentions like to exploit the vast natural resources of this unexplored continent (the sixth continent bigger than Europe, is rich in Uranium which could really help him fuel-up his super-planes) and also set-up a safe base there.

The Ahnenerbe was an occult society formed by Hitler’s highest ranking officials whose secret intentions was to explore the reality in religions and myths around the world. The idea was to combine the ancient super knowledge to current scientific knowledge and to make the Third Reich ‘the Untouchables’. Even now, the secret services of leading powers hunt for Ahnenerbe’s secrets. It is of no doubt that they attained great unknown knowledge and sadly also destroyed some of it (mainly books, they literally burned them on a mass scale) before it could be disclosed to the world. But many records of their quest for ancient knowledge are still hidden out there to be found and benefited from.

According to Ahnenerbe, there were people and civilizations much before the current records of the beginning of humans, who attained much more knowledge and advancements in every fields than the so called ‘ Modern men ’ today. But somehow these civilizations got wiped out completely due to some natural calamity, and thus we humans had to start again from scratch.

Hitler’s Ahnenerbe also believed humans were not alone in this gigantic universe consisting of millions of planets and solar systems (stars). They believed a higher knowledge were locked and hidden away in various parts of the world in the form of ancient manuscripts, carvings, books, etc. And the people who could lay

their hands and join the pieces of this ‘forgotten ancient puzzle’ (scattered all around the world) could be the new super powers and could rule the world.

Americans have always been interested in the 'techno-magical' legacy of Germany. Consequently when they defeated Germany in World War 2, they were eager to attain all the German secret knowledge.

But the allies were shocked to discover that thousands of highly qualified Third Reich specialists had vanished and weren't listed as dead. Over a 100 German submarines had also vanished, never to be found. The rumor was that these scientists were shifted to Antarctica along with their huge labs and machinery in these missing submarines. Thus America had to make sure that they had completely won over Germany and will not be sadly surprised by an attack with German Super-Weapons, which they may not be able to even respond. So the US military plans a secret expedition to Antarctica code named ‘ Operation High jump ’.

Suddenly the inexplicable occurs; the expedition, designed to last 6 months, is quickly aborted after two months, leaving the Antarctic coast deserted. It was an actual retreat.
