**Real Mathematical Analysis (Undergraduate Texts in Mathematics)** Charles C. Pugh
Was plane geometry your favourite math course in high school? Did you like proving theorems? Are you sick of memorising integrals? If so, real analysis could be your cup of tea. In contrast to calculus and elementary algebra, it involves neither formula manipulation nor applications to other fields of science. None. It is Pure Mathematics, and it is sure to appeal to the budding pure mathematician. In this new introduction to undergraduate real analysis the author takes a different approach from past studies of the subject, by stressing the importance of pictures in mathematics and hard problems. The exposition is informal and relaxed, with many helpful asides, examples and occasional comments from mathematicians like Dieudonne, Littlewood and Osserman. The author has taught the subject many times over the last 35 years at Berkeley and this book is based on the honours version of this course. The book contains an excellent selection of more than 500 exercises.

**From reader reviews:**

**James Crow:**

This Real Mathematical Analysis (Undergraduate Texts in Mathematics) book is absolutely not ordinary book, you have it then the world is in your hands. The benefit you have by reading this book is definitely information inside this guide incredible fresh, you will get details which is getting deeper anyone read a lot of information you will get. This specific Real Mathematical Analysis (Undergraduate Texts in Mathematics) without we know teach the one who reading it become critical in considering and analyzing. Don't possibly be worry Real Mathematical Analysis (Undergraduate Texts in Mathematics) can bring once you are and not make your case space or bookshelves' turn out to be full because you can have it with your lovely laptop even cell phone. This Real Mathematical Analysis (Undergraduate Texts in Mathematics) having excellent arrangement in word and layout, so you will not really feel uninterested in reading.

**Patricia Spear:**

Your reading 6th sense will not betray a person, why because this Real Mathematical Analysis (Undergraduate Texts in Mathematics) reserve written by well-known writer who really knows well how to make book that could be understand by anyone who have read the book. Written throughout good manner for you, dripping every ideas and producing skill only for eliminate your current hunger then you still uncertainty Real Mathematical Analysis (Undergraduate Texts in Mathematics) as good book not just by the cover but also through the content. This is one reserve that can break don't determine book by its cover, so do you still needing an additional sixth sense to pick this particular!? Oh come on your looking at sixth sense already told you so why you have to listening to a different sixth sense.

**Harold Felix:**

You can obtain this Real Mathematical Analysis (Undergraduate Texts in Mathematics) by browse the bookstore or Mall. Just simply viewing or reviewing it can to be your solve challenge if you get difficulties for the knowledge. Kinds of this book are various. Not only by simply written or printed but additionally can you enjoy this book by simply e-book. In the modern era similar to now, you just looking by your mobile phone and searching what your problem. Right now, choose your current ways to get more information about your e-book. It is most important to arrange yourself to make your knowledge are still upgrade. Let's try to choose proper ways for you.

**Debera Jessie:**

That reserve can make you to feel relax. This specific book Real Mathematical Analysis (Undergraduate Texts in Mathematics) was vibrant and of course has pictures on the website. As we know that book Real Mathematical Analysis (Undergraduate Texts in Mathematics) has many kinds or style. Start from kids until young adults. For example Naruto or Investigator Conan you can read and think that you are the character on there. Therefore , not at all of book are usually make you bored, any it offers up you feel happy, fun and chill

out. Try to choose the best book for yourself and try to like reading this.
